Bristol Bay in the News July 10, 2013

Analysis of the comments received during EPA's second comment period on the Bristol Bay Watershed Assessment shows an overwhelming majority of nearly 70% support the Assessment and protection for Bristol Bay from mining on a massive scale. Comments – currently numbering more than 650,000 – continue to be loaded on the federal docket, with a high likelihood of support numbers growing.

As noted in stories in the *Washington Post* and *Mother Jones* magazine, the vast majority of comments critical of EPA's Assessment came from Resourceful Earth, a Washington, D.C. based project funded by the Koch Brothers, Exxon Mobil, mining companies and others.

An editorial in the *Bellingham Herald* and *Tacoma News Tribune* in Washington state says the risks are too great with the planned Pebble Mine, and the EPA should use its power under the Clean Water Act to deny a required federal permit for the project. The editorial board asks: "What happens if the mining companies involved go out of business? Whose responsibility will it be to ensure the dams don't fail? And who pays for damages if they do?"

Lastly, the Center for American Progress issued a position statement on Bristol Bay that says the Pebble mine threatens the region's sustainable economy and way of life. They urge the EPA to finalize its Watershed Assessment soon and say the agency should proactively "identify any areas that are too sensitive to serve as mining-waste dumps..."

The recreational and spiritual value they provide far exceeds whatever monetary value may be derived by exploiting their natural resources...[Click here to read more](#)

Have you heard the one about the Pebble Mine?

Joel Reynolds

The Hill

Three foreign mining executives walk into a bar and say to anyone who'll listen, "we want to dig one of the largest open pit mines on Earth in the middle of Alaska's world class wild salmon fishery. We promise not to hurt the fishery or interfere with the 22,000 jobs and \$1.5 billion it generates each year...[Click here to read more](#)

Caution on Bristol Bay

Washington Post Editorial

The Daily Camera

In the rivers, streams and wetlands of southwest Alaska, tens of millions of bright pink fish swim upstream every year to spawn. The watershed area around Bristol Bay is one of the last unspoiled habitats in the world, home to moose, bears, caribou and, yes, sockeye salmon. It's also now at the center of one of the nation's largest conservation battles...[Click here to read more](#)
